

## **E-scooter & E-cycle Activity Description**

### **Background**

Bikeworks leads on the development and delivery of skills courses for:

- e-cycles
- e-cargo cycles, and
- e-scooters

This is in addition to cycle skills delivery for Bikeability and All-Ability sessions, promoting a wider range of inclusive active travel choices.

Bikeworks does this by increasing the knowledge and skills of the riders, promoting the safe use of alternative modes of travel.

Free-to-access e-scooter and e-cycle training sessions are delivered to members of the public who want to learn skills and gain confidence using an e-scooter or e-cycle.

These free-to-access sessions are delivered in partnership with companies, such as Tier or Lime, to promote the safe use of an alternative way to travel by equipping the public with riding skills and greater awareness.

Free ride credits as a further incentive to continue to put these new skills into practice are provided to participants and can be accessed through an app.

### **Session Delivery**

To deliver a session you must be a Level 2 Award Instructor, registered 1st4sport. This can be Provisional or Fully Qualified status.

Sessions are two hours long and delivered in small groups.

Held on weekdays and weekends as either a morning or afternoon slot.

Training covers 'off-road' skills training in a controlled environment and 'on-road' training using identified local roads.
